

METEKTRON

THE RETROFIT CIGS PV SYSTEM

METEKTRON from BiPVco is a lightweight, universal, retrofit Solar PV system designed for industrial and commercial buildings that cannot support the weight of a conventional Solar PV array.

METEKTRON incorporates CIGS Copper Indium Gallium Selenide thin-film solar panels bonded directly to an aluminium cassette and is supplied as a complete kit comprising integrated PV panel and cassette, attachment clips, screws, flashings, cable trays and MC4 inter-connectors. METEKTRON can be fixed to most trapezoidal and composite panel roofs and weighs less than 7kg/m² installed.

FEATURES AND BENEFITS

- High-efficiency, lightweight thin-film CIGS solar panels
- Contains no glass or soldering for ultimate panel durability
- Self-cleaning barrier film reducing panel maintenance
- Superior low light performance Vs. crystalline silicon
- Integral bypass-diode panel architecture for optimum shading performance
- Lightweight and durable aluminium cassette design with integral recess drainage
- Concealed extruded bi-directional aluminium brackets with integral lateral micro-ribs and pre-punched 6.5mm dia. fixing holes
- Central fixed point position
- No cold bridging and accommodates thermal movement
- Excellent resistance to wind loads
- No additional mounting system required
- 6.8kg/m² installed weight
- Simple installation and connection procedure with concealed junction boxes

DIMENSIONS

Aluminium Cassette:

- Module: 400mm
- Length: 2970mm
- Height: 30mm
- Rib recess: 20mm
- Clip: 80mm

CIGS Solar PV 135W Panel:

- Width 358mm
- Length 2960mm
- Thickness 3.5mm
